

FIBER OPTIC PACH CABLE DATASHEET

LC/UPC to ST/UPC Duplex OM2 Multi Mode PVC (OFNR) 2.0mm – 3.0mm

Patch Number: **MTPC-OM2-LCUSTUDX-xM (x = Meters)**

Application:

The 50/125 μ m OM2 multimode bend insensitive fiber optic cable is less attenuation when bent or twisted compared with traditional optical fiber cables and this will make the installation and maintenance of the fiber optic cables more efficient. It can also save more space for your high density cabling in data centers, enterprise networks, telecom room,

server farms, cloud storage networks, and any places fiber patch cables are needed. This 50/125 OM2 multimode fiber optic cable is ideal for connecting 1000BASE-SX, SFP transceivers etc. for gigabit Ethernet and fiber channel applications.
